Social Inclusion and Community Activation Programme 2018-2023 *Emerging Needs Group 2023*

LCDCs can select one Emerging Needs Group for their Lot per year. This can vary each year and is a group that the LCDC wish to see particular engagement with.

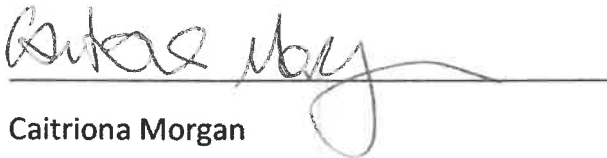

Please note that the Emerging Needs Group should be 'new' and not a subset of an existing target group. For example naming particular disadvantaged areas which are already covered under disadvantaged communities, newly unemployed (the unemployed) and international protection applicants (new communities).

Please confirm below the Emerging Needs Group for 2023, if applicable.
If no emerging needs group is applicable, please insert N/A in the box below.

| | |
|---|---|
| Lot | Galway City (26-1) |
| Emerging Needs Target Group 2023 | Older people should remain the emerging needs group as they are continuing to present with issues of social isolation and lack of digital skills at a community level. This would align with the Council's focus on older people and the support Galway City Partnership are providing to the establishment and maintenance of an Older Persons Council in Galway City. |

Please email this template to your Pobal Development Coordinator by 4th November 2022.
